Student at the Undergraduate level in Computer Science and Engineering major in Artificial Intelligence and Machine Learning with interest in software development and creating web applications. I enjoy creating solutions to real problems and have created applications such as AI chatbot and price tracker to improve my development skills. The following are the technologies which I am familiar with: Python, JavaScript, React.js, Node.js, Express.js, MongoDB, and SQL. I am an active learner who enjoys trying out new technologies and solving problems through coding challenges and personal projects.

Education

Vellore Institute of Technology, Bhopal, Madhya Pradesh - (2022 - 2026)

B.Tech Computer Science Engineering

Specialisation in Artificial Intelligence and Machine Learning

CGPA: 7.98

Projects

QuillWeaver - AI Novel and Book Generator

[Demo](#) [GitHub](#)

- Created an AI driven web application which turns ideas and instructions provided by the user into novels, stories, and books.
- Integrated AI driven content creation capabilities that help to generate chapters, characters, plots, and full length stories from basic input prompts.
- Designed a user-friendly writing tool which lets the user steer and shape the content being created in their book.
- Created a modern, responsive frontend with focus on the ease of creating long form written content.

PriceWise – Advanced Price Monitoring Web Application

[Demo](#) [GitHub](#)

- Created an advanced web application that monitors prices of products in real time from ecommerce websites.
- Used automated scraping techniques to get information about the product, its prices, and availability.
- Generated dashboards where users can track their products and get alerts when the prices fluctuate.
- Optimised REST APIs to fetch required information instantly.
- Developed responsive UI using React.js and TailwindCSS.

Experience

Python Programmer

[Certificate](#)

MyDailyWork | April 2026 – May 2026

- Completed an internship of 4 weeks, which was entirely based on Python programming.
- Got involved in programming tasks and problem-solving through Python.
- Acquired experience in writing python code.

Skills

- Programming Languages:** Python, SQL, Java, TypeScript.
- Technologies:** Node.js, React.js, TailwindCSS, REST API.
- Relevant Courses:** AI, ML, Deep Learning, OS, NLP, DBMS.
- Tools:** Git, GitHub, VSCode, MongoDB, Salesforce, AWS.

Certifications

- Ethnus Salesforce Developer Certification Program.
- SmartBridge MongoDB Full Stack Developer MERN.

Achievements

- Over 250+ programming problems solved on LeetCode in Data Structures and Algorithms.
- Active participant in various hackathons and coding competitions.
- Various certifications in the field of AI, Machine Learning, NLP, Data Science, and Full Stack development from Hugging Face, Great Learning, and Kaggle.
